

Photo 12. Wason Park Tuff (Tw) and Sheep Creek fault zone. Erosional remnants of Wason Park Tuff (27.38 Ma) form sinuous outcrops, marking a paleovalley that strikes obliquely to present-day drainage. In distance are downdropped ignimbrite sheets along Sheep Creek fault zone. Tab, andesite of Big Dry Gulch; Tbt, bedded tuff; Tcr, Carpenter Ridge Tuff; Tdb, debris-flow deposits of Buffalo Pass Campground; Tfc, Fish Canyon Tuff; Tsc, Saguache Creek Tuff; Ttsn, tuff of Spanish Creek (nonwelded); TWS, Sapinero Mesa Tuff. View is obliquely to east (LM); Google Earth image.
